

Referee Pre-Approval

As defined by ISO9712, supervision of candidates gaining experience by NDT personnel certified in the same method under supervision or by non-certified personnel who, in the opinion of the certification body, possess the knowledge, skill, training, and experience required to properly perform such supervision.

Referees not holding appropriate ISO9712 certification must supply evidence of knowledge, skill, training, and experience required to properly perform such supervision.

This form can be used by candidates to gain pre-approval for non-certified referees, to prevent rejection of supervised experience hours on application for certification.

Note 1: It is strongly suggested that a copy of the nominated referees CV is attached to this request.
